Voici la correction.

$\frac{48}{10} = \frac{10}{10} + \frac{10}{10} + \frac{10}{10} + \frac{10}{10} + \frac{8}{10} = 1+1+1+1+\frac{8}{10} = 4+\frac{8}{10}$

$\frac{53}{10} = \frac{10}{10} + \frac{10}{10} + \frac{10}{10} + \frac{10}{10} + \frac{10}{10} + \frac{3}{10} = 1+1+1+1+1+\frac{3}{10} = 5+\frac{3}{10}$

$\frac{40}{10} = \frac{10}{10} + \frac{10}{10} + \frac{10}{10} + \frac{10}{10} = 1+1+1+1 = 4$

$\frac{61}{10} = \frac{10}{10} + \frac{10}{10} + \frac{10}{10} + \frac{10}{10} + \frac{10}{10} + \frac{10}{10} + \frac{1}{10} = 1+1+1+1+1+1+\frac{1}{10} = 6+\frac{1}{10}$

$\frac{56}{100} = 0+\frac{56}{100}$

$\frac{124}{100} = \frac{100}{100} + \frac{24}{100} = 1+\frac{24}{100}$

$\frac{163}{100} = \frac{100}{100} + \frac{63}{100} = 1+\frac{63}{100}$

$\frac{206}{100} = \frac{100}{100} + \frac{100}{100} + \frac{6}{100} = 1+1+\frac{6}{100} = 2+\frac{6}{100}$
